PERSONAL PROJECTS

Restaurant Menu Ordering App

- Developed a dynamic restaurant menu ordering application using React Native. This app allows customers to browse menus, customize orders, and place them directly from their mobile devices. Key features include a user-friendly interface, real-time menu updates, secure payment processing, and order tracking. The app also integrates with restaurant management systems to streamline operations and enhance customer service.

Video Chat App

- Developed a real-time video chat application designed to facilitate seamless communication. The app features high-quality video and audio, an intuitive user interface, end-to-end encryption for secure conversations, and cross-platform compatibility.
